

HYDRAULIC DOCK LEVELLERS

PICKERING'S LIFTS
LOADING SYSTEMS

KELLEY® Hydraulic Dock Levellers, featuring premier lug-style lip hinges, simplified hydraulics, internal velocity fuses and open frames; designed and rigorously tested to meet the growing demand for operational efficiency and safety on busy loading docks.

Patented hydraulic velocity fuse restricts free fall for improved safety

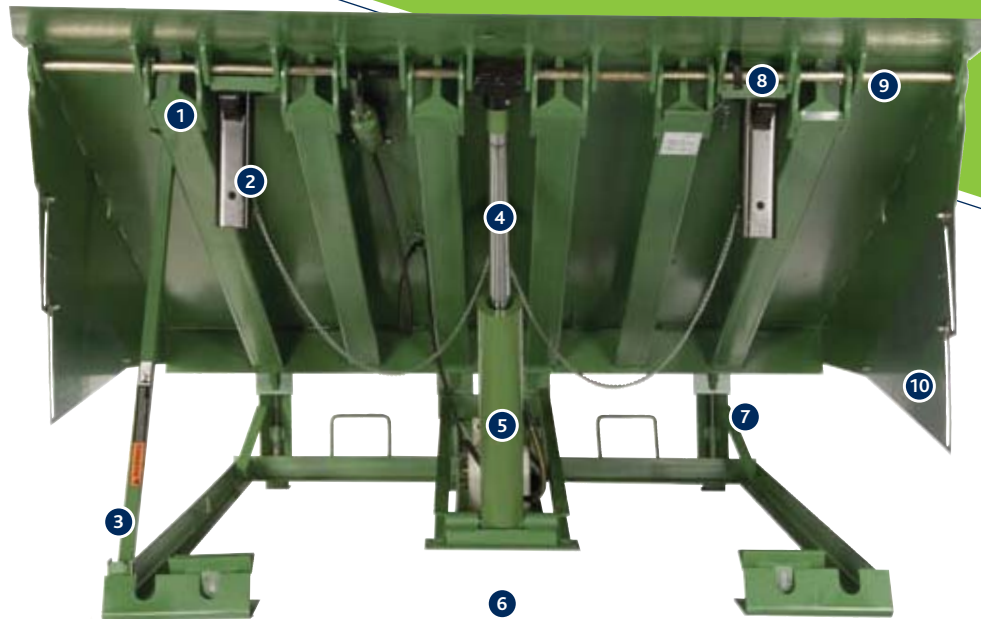

- SAFEFRAME® CONSTRUCTION
- SINGLE PUSH BUTTON CONTROL
- IMPROVED SAFETY WITH SAFETY STOP SOLENOID AS STANDARD
- MASTER AND COMBO CONTROL PANELS
- PROTECTED HYDRAULIC PUMP UNIT
- SELF CLEANING HINGE
- DESIGNED TO REDUCE MAINTENANCE COSTS & EXTEND PRODUCT LIFE

KELLEY®

**A SAFER,
STRONGER
DOCK LEVELLER**

*The lift business **everyone** wants to work with*

A continuing research programme is in effect. We reserve the right to incorporate product improvement at any time without prior notice.

- 1 Patented Lambda beam design and construction.
- 2 Automatic retracting 27,000kg structural steel dock level support legs allowing full, unrestricted working range.
- 3 Integral support strut keeps ramp raised for routine maintenance and cleaning.
- 4 102mm diameter hydraulic cylinder mounted at front of ramp for maximum strength and efficiency.
- 5 Totally enclosed, non-ventilated, unitised hydraulic pump and motor assembly with single hose per cylinder for longer life and lower maintenance cost.
- 6 Unique KELLEY® open frame design.

The KELLEY® HP Dock Leveller provides automatic hydraulic operation with a single push-button activation and a hydraulically activated lip

- 7 Exclusive SafeTFrame® provides superior structural support and level interface with warehouse floor.
- 8 Integral lip lock keeps lip raised for routine maintenance and cleaning.
- 9 Self-cleaning lug-style lip hinge.
- 10 Full operating range toeguard.

KELLEY® Master and Combo Control Panels - improving efficiency and safety
