“

...the upkeep of loading equipment ensures continued efficiency and is an integral part of the logistics and distribution process...

”

From supply and installation to service and maintenance, Pickering's Lifts Loading Systems is on hand to provide the solution for your loading bay environment.

Loading equipment can enhance the productivity of goods movement within all business environments, and its upkeep is imperative to ensure maximum operational efficiency. To the user and company, it is an integral part of the logistics and distribution process.

Pickering's Lifts Loading Systems provides products and services designed to keep your loading bay working faultlessly. From regular

servicing to emergency or reactive repairs, whatever the type of dock leveller, roller shutter or loading bay equipment you have, Pickering's Lifts Loading Systems has the expertise to keep your business moving in any situation.

We also offer maintenance contracts which are designed to ensure your loading equipment is in the best possible hands when it comes to servicing and repair.

As part of our ongoing drive to add value to our services, we are also able to advise on modernisation and improvements for loading products including the reduction of energy consumption, increased reliability and performance, and the optimisation of traffic flow.
